

Additional Information - Fee Rates and Applications

The iPHD standard fee schedule is based on actual costs incurred. Fees, which are established under federal guidelines, are reassessed approximately every two years. The current fee schedule applies through June 30, 2026. **Fees are based on the fee schedule in effect at the time of data transfer and are due at that time.**

Please note that published iPHD fees cover the cost of application review, execution of data agreements, and preparation and delivery of data for projects using limited data sets of iPHD data. Fees also support the enhancement of adding an anonymized person-level identifier that allows linkages across data sets and across data years.

Additional work will incur additional special request or technical assistance fees. Situations that may lead to the application of such fees include:

1. Projects that reuse previously approved and prepared iPHD data (new DUA for new scope of work)
2. Addition of dataset or data years for a previously approved and prepared iPHD data (plus standard fees for new dataset/additional years)
3. Request for non-iPHD data integration (3rd party data linkage)
 - a. Geographic-level data linkage below zip code level, such as census tract/blocks and geo-coordinates
 - b. Person-level data linkage using personally Identifiable Information (PII) such as Name, dates of birth, etc.

Plans for external data linkages or other special needs should be discussed with our data team to ensure feasibility and compliance. Once feasibility and compliance have been determined, additional fees will be applied on a per hour basis (\$500/hour) for the additional work. For approved projects, the iPHD team will provide upper-bound estimates of hourly charges prior to commencing data preparation.

Example: iPHD data only, only standard fees apply

Description	Group	Dates	# years	Rate
NJ Birth Data	1	2010 to 2021	12	\$ 4,000.00
NJ Mortatlity Data	1	2010 to 2021	12	\$ 4,000.00
NJ Hospital Discharge Data Collection System	2	2017 to 2022	6	\$ 4,800.00
NJ EMS	3	2017 to 2022	6	\$ 10,000.00
Total Due				\$ 22,800.00

Example: iPHD data with geographic-level data linkage

Description	Group	Dates	# years	Rate
NJ Birth Data	1	2000 to 2021	22	\$ 4,000.00
NJ Mortatlity Data	1	2000 to 2021	22	\$ 4,000.00
NJ Hospital Discharge Data Collection System	2	2010 to 2022	13	\$ 9,500.00
Geographic level linkage				\$ 5,000.00
Total Due				\$ 22,500.00
